

Proposal on Smut Control Rejected

Capitol News Service
SACRAMENTO—Governor Ronald Reagan's legislative program has suffered another setback as the assembly committee on criminal procedure rejected a pair of bills aimed at cracking down on the smut industry.

The committee killed SB 78 and SB 79 by Senator Robert J. Lagomarsino, R-Ojai. The bills already had cleared the senate and were supported, along with Reagan, by Lt. Gov. Robert H. Finch and Attorney General Thomas C. Lynch.

Democrats voting in opposition. Six favorable votes were needed.

ASSEMBLYMAN John J. Miller, Democratic Negro assemblyman from Berkeley, argued against a position that sale of smut to children should be prohibited.

"Even if it is the filthiest matter, who are we to say what they may read?" Miller asked.

The committee postponed for two weeks consideration of AB1664 by a committee

member, Assemblyman John T. Knox, D-Richmond. Knox's bill would set up a new definition of obscene material, as it applied to sale of anyone under the age of 17. However, his bill would not change the present definition of obscenity.

THE PRESENT language in the law provides matter is obscene only if it is found to be "utterly without redeeming social importance," a loophole which has made enforcement difficult.

Arts, Crafts On Agenda For Summer

Vacation Church School at Christ the King Lutheran Church will begin July 31 and run until Aug. 11 from 9 a.m. to 11:45 a.m.

There will be classes from kindergarten through eighth grade with crafts and recreation for all classes in each department.

Superintendent will be Mrs. Linus Buss; assistant superintendent will be Mrs. Douglas Seidel. Department leaders will be Mrs. Vincent Ferruccio, kindergarten; Mrs. Bill Moonhey, primary; Mrs. Dale Anderson, junior; and Mrs. Don Fisher, junior high.

Registrations will be taken at the church office.

Many supporters of the bill, including Finch, had actively opposed Prop. 16 on the ballot last November—the so-called anti-obscenity amendment. Their opposition was because of the form of the proposed amendment but not to its purpose.

The Lagomarsino bills died in the criminal procedure committee on a straight party-line vote, with the five Republican members voting in favor of them and the five

New Testing Method Told By Hanson

The use of a raised-lip compression mold was described this month by W. J. Hanson, laboratory director of Dow Chemical's Torrance plant and member and former president of the Torrance Board of Education, as a significant improvement in measuring the physical properties of plastics in a production plant.

Hanson delivered a paper on the topic at a symposium sponsored by the American Society of Quality Control in Los Angeles.

He said the new quality control method was developed to overcome problems encountered in testing materials developed with conventional injection and compression molding techniques.

We've designed a new telephone directory for you.

Three new directories, as a matter of fact. Instead of the old, rather bulky and cumbersome Southern Section Directory, General Telephone will have, beginning in October 1967, three separate directories each containing its own alphabetical section designed for your own local calling needs.

They are the Long Beach Area Directory, which will include such communities as Long Beach, Lakewood, Seal Beach, Los Alamitos, etc.; the Mid-Cities Area Directory which will include such communities as Bellflower, Downey, Norwalk, etc.; and the South Bay Area Directory containing listings for such communities as the Palos Verdes Peninsula, Redondo

Beach, Torrance and Manhattan Beach.

The classified or Yellow Pages portion of your new directory will be the same as in the present directory and will continue to cover the same area.

Your White Page (alphabetical) listings will be in the appropriate directory according to the location of your business or residence. If you would like an alphabetical listing in directories other than the one serving your area, please call your local General Telephone business office.

We know you will find your new directory easier to use, easier to handle and store—and much more attractive.
